SUMMARY

AI-focused Data Analyst with nearly 2 years of experience in business intelligence, data analytics, and cloud-based data solutions. Skilled in Power BI, SQL, Python, Microsoft Azure, and data engineering technologies. Experienced in Generative AI, conversational analytics, and intelligent automation, transforming complex data into actionable insights and scalable business solutions.

EDUCATION

Bachelor of Technology, Computer Science and Engineering (Artificial Intelligence) Jul 2020 - Jul 2024
Parul University, Gujarat, India 8.28 CGPA

TECHNICAL SKILLS

Programming and Analytics: Python, R, SQL, Excel Macros (VBA), DAX, Power Query
Data Processing and Visualisation: Power BI, Tableau, Matplotlib, Seaborn
Cloud, Data Engineering and Databases: Microsoft Azure, Azure Data Factory, Azure Databricks, Azure Synapse Analytics, Azure Data Lake, SQL Server
Certifications: Microsoft Certified: Azure AI Fundamentals (AI-900),Microsoft Certified: Azure Fundamentals (AZ-900),Microsoft Certified: Power Platform Fundamentals (PL-900)

PROFESSIONAL EXPERIENCE

Windowmaker Software Pvt Ltd, Vadodara, Gujarat: Data Analyst Aug 2024 – June 2026

- Led data validation and quality assurance initiatives, performing root-cause analysis and data correction processes to ensure high-quality datasets for internal stakeholders and clients.
- Explored and applied Generative AI and conversational analytics capabilities to enhance Business Intelligence workflows, enabling natural-language interactions with enterprise data and accelerating insight generation.
- Evaluated AI-powered Business Intelligence solutions, including Power BI Copilot–style capabilities, for automated dashboard creation, data exploration, SQL generation, and explanation of business trends using natural language.
- Worked with Agentic AI concepts and multi-agent frameworks such as CrewAI to automate analytical workflows, where specialized AI agents collaborated on data research, analysis, and report generation tasks.
- Supported the integration of modern AI-driven approaches into analytics processes, improving productivity, reporting efficiency, and decision-making capabilities.

Internkaksha IT Solutions, Delhi, India: Data Analyst Intern Dec 2023 – March 2024

- Developed interactive Power BI dashboards and analytical reports by integrating data from multiple sources, enabling stakeholders to monitor key business metrics and make data-driven decisions.
- Automated repetitive reporting and data preparation tasks using Power BI and Excel-based workflows, reducing manual effort and improving operational efficiency.
- Conducted exploratory data analysis to identify trends, patterns, and business opportunities, supporting strategic decision-making processes.

PERSONAL PROJECTS

RAG-Based AI Chatbot January 2026

Designed and developed a Retrieval-Augmented Generation (RAG) chatbot to answer user queries from custom knowledge bases using Large Language Models (LLMs).

- Built document ingestion pipelines to process PDFs and text documents, generate vector embeddings, and store them in ChromaDB for semantic search and retrieval.
- Integrated LangChain and OpenAI models to retrieve relevant context and generate accurate, grounded responses while minimizing hallucinations.
- Implemented conversational memory and context-aware interactions to support multi-turn conversations.
- Optimized retrieval performance through document chunking, embedding generation, and similarity search techniques, improving response relevance and accuracy.
- Tech Stack: Python, LangChain, OpenAI GPT, ChromaDB, Vector Embeddings, RAG, Prompt Engineering.

End-to-End Data Engineering Project on Microsoft Azure. February 2025

Data engineering on manufacturing company data.

- Designed and implemented a scalable data pipeline using Azure Data Factory, Azure Databricks (PySpark), and Azure Synapse Analytics to process and analyze large-scale manufacturing company data.
- Developed robust ETL workflows integrating structured and unstructured data sources, incorporating error handling and monitoring for 99.9% pipeline uptime.
- Optimized data models in Azure Synapse Analytics, improving query performance by 50%, enabling efficient reporting and analytics. Ensured data security and compliance by implementing RBAC, Azure Key Vault, and adhering to GDPR standards for sensitive information.
- Tech Stack: Microsoft Azure, Azure Data Factory, Azure Databricks (PySpark), Azure Synapse Analytics, Azure Data Lake, SQL, Python, Azure Monitor, Key Vault, RBAC.

Linkedin automation December 2024

Implementation of Python libraries(Naas) with API

- Developed an automated LinkedIn analytics solution using Python, NaaS, and LinkedIn APIs to monitor and track followers of target company pages in real time.
- Built data extraction and processing pipelines to collect, clean, and store follower information in CSV format for analysis and reporting.
- Implemented automated workflows to identify new followers and streamline networking activities through personalized connection request automation.
- Utilized Pandas and API integrations to perform data validation, deduplication, and trend analysis, enabling efficient lead generation and follower growth tracking.
- Gained hands-on experience in API development, workflow automation, intelligent data processing, and scalable analytics solutions.
